

BJ

aka BlackJack

Update JAN 2022:

BJ (aka BlackJack) we believe to be a small shep/lab mix, around 50lbs, approx 5yrs young (MAY birthday), current on vaccines, flea /tick free, and heartworm negative, and neutered by end of December. BJ is house trained and crate trained. After 5 months of care and recovery from Heartworm disease we find BJ is excited to meet/greet people, eager to catch cats, squirrels and/or birds, LOVES car rides, and enjoys sniffing almost every tree. Cookies are a favorite treat and help with training, and provides him with comfort. BJ is ready to join a family that can help him become comfortable and acclimated to life INSIDE a home; sadly, he spent much of his early life outside on a chain. BJ would do best with adults only (no small children). He has met other dogs on leash and off leash and shown little interest, AND, he has shown no aggression with dogs at the vet office where he is being boarded. A foster or forever family would be a wonderful gift for this boy along with a fenced yard so he can ENJOY the freedom of a roaming "unchained". We believe BJ to be a "special needs" boy as a recent XRAY indicated he has a partially shattered pelvis and displaced hip (from an old injury); mobility issues will be a concern as he ages; pain medication or CBD Oil will most definitely help. IF interested in BJ, please send an application located on the FOSTER and ADOPTME page to Dream4pets.org
