

Bridget

3 year spayed, female Husky/Heeler, up-to-date (utd) on vaccines, HW negative

High energy, very playful, high prey drive, and very intelligent

Housetrained and very social w/other dogs

Would not recommend household w/cats given her strong prey instinct

Loves being outside or inside - needs fenced yard due to high energy level

When meeting new people can be shy and fearful initially

Bridget needs a calm, secure, and stress free environment to thrive, she has some

separation anxiety due to her home environment at a young age (6 -8 months)

Recommend family w/children over 18 years of age

Definitely needs fenced yard with high fence (possible climber)

Current owners can no longer care for her (due to their health and her high energy)
