

Buddy

BUDDY is a bulldog, boxer, terrier blend, neutered male, close to 50lbs, and like all of our fostered kids current on vaccines, heartworm negative, crate trained, house trained, and walks well on leash. He is approx 6 yrs young and has a funny and wonderful personality ! He will bring you his favorite toy in hopes you will hold it while he chews or tugs. **He loves "nose work" the more opportunity for him to SNIFF (hunt) & FIND the more FUN for him !!** He enjoys walks (if temps are cool), then a afternoon snack , then a nap in "his " easy chair or crate or couch corner. He sits politely and drools while you prepare his meals, and will tell you when he is ready to go out to potty or take a car ride ;-) BUDDY is very **SMART** he knows Sit, Stay, Leave it, and Heel . He is **confident** and will make his own decision if his human is not **consistent** with rules. His recall and obedience grows stronger WHEN his trusts grows stronger with his caretaker, until then his curiosity to explore is dominant. If he sees "prey" he may jump a fence; so, it is best not to leave him unattended in a yard. He enjoys "hanging" with his human companions and will give you kisses (ear licks) after he feels you have earned his trust and respect as his loving caretaker. Car rides , a short walk, meandering the yard are some FAVORITE activities for BUDDY, and being a couch potato while you watch yr favorite shows ! Sometimes he will "talk" in the car (due to his excitement) while you drive to your walking destination, or give you KISSES on the ear as you drive He shares a foster home with older dogs of similar size (male and female) and is indifferent to them.
