

# Buddy

BUDDY is approximately 6 yrs young, neutered male, close to 50lbs, and like all of our fostered kids current on vaccines, heartworm negative, crate trained, house trained, and walks well on leash. BUDDY has such a wonderful personality: He sits politely and drools while you prepare his meals. And will bring you his favorite toy in hopes you will hold it while he chews or tugs. . He loves "nose work" the more opportunity for him to **SNIFF (hunt) & FIND** the more FUN for him !! He enjoys his afternoon snack and then will curl up and nap in "his " easy chair or crate or couch corner. BUDDY is very **SMART** he knows Sit, Stay, Leave it, and Heel - but needs reminding that "you mean what you say" because he is **confident** and will make his own decision if his human is not **consistent** with rules. His **RECALL** and **OBEDIENCE** grows stronger WHEN his trusts grows stronger w/caretaker and his environment ....until then his curiosity to explore is dominant. If bored and left alone, he may jump a fence; so, it is best not to leave him unattended in a yard. He enjoys "hanging" with his human companions and will give you kisses (ear licks) after he feels you have earned his trust and respect as his loving caretaker. Car rides and walks are some FAVORITE activities and importance for him! Sometimes he will "talk" in the car (due to his excitement) while you drive to your walking destination, or give you KISSES on the ear as you drive He shares a foster home with other (older) dogs of similar size (male and female) and is indifferent to them. *We know training classes always enhance the relationship between owner and dog, and DREAM is willing to help with the cost of Buddy's training when he is adopted.* Adoption application is online; visit the **ADOPTME** page at [Dream4pets.org](http://Dream4pets.org)
