

Buddy

If your looking for a young man to keep you company on the couch, or just need a buddy to be your "favored" companion when you come home from work, or a furry friend to take a short walk almost daily...then BUDDY might be the companion for you. BUDDY is a neutered male, about 63lbs, and like all of our fostered kids current on vaccines, heartworm negative, crate trained, house trained, and walks well on leash. We believe he is a "blend of bulldog, boxer, and terrier" and estimate his age to be around 6yrs. BUDDY has a wonderful personality and can be quite the "talker" ! He sits politely and drools while you prepare his meals. He will bring you his favorite toy in hopes you will play with him for awhile; then he is content to play alone. On his daily walk BUDDY loves "nose work" the more opportunity for him to SNIFF (hunt) & FIND the more FUN for him !! He enjoys a lite afternoon snack and then will curl up and nap in "his " easy chair or on top of his crate or in a couch corner. BUDDY is very **SMART**, he knows Sit, Stay, Leave it, and Here . His RECALL and OBEDIENCE grows stronger WHEN his trusts grows stronger with his caretaker; consistent rules and high value (low calorie treats) are important to BUDDY....HE thrives on routine. BUDDY's curiosity to explore and protect is strong it is best not to leave him unattended in a yard; if bored and left alone he may jump a fence. He enjoys "hanging" with his human companions and will give you kisses (ear licks) after he feels you have earned his trust and respect as his loving caretaker. He shares a foster home with senior dogs of similar size and is indifferent to them.
