

BUZZ

This boy is 5 yrs young, almost 60lb, neutered, lab mix, current on vaccines, and hw negative. Buzz thrives on **"trusted family companions"** who maintain consistency & routine in his life, and patient leadership to help build his confidence with new encounters, strangers, and other dogs. (Buzz will do almost anything to please you ONCE he has your trust). **Buzz loves family life and car rides, running, and enjoying the great outdoors w/human companions; "family and routine" are the safest and most secure environment he trusts.** Buzz has adjusted very well "as a family companion" in his foster home (with other dogs and children ages 8, 12 and 15). He needs reminding about "politely" meeting other dogs on leash; off leash he plays hard with other dogs and will show a preference to be dominant; we are unsure about cats. He prefers his "trusted companions" to be women but has shown acceptance of some men. You won't find BUZZ in a crowd; he is not comfortable around strangers because as a young puppy he had very little socialization; consequently, unfamiliar people and new environments can be challenging for him.
