

Fred

FRED is a neutered male, 2 or 3 years young, Lab/GermanShortHair Pointer mix, 75 lbs., fully vaccinated, flea free, heartworm negative, and micro-chipped. Like every young dog, Fred loves attention, exercise, and playtime; he would do best living with another furry canine companion that has a similar disposition and interest in playing and living a well balanced with a forever family in a forever home. He does well with adults and children (over the age of 12 due to his size). He has many **LOVES**: Spending time with his companions (outside or inside), Car rides, Long walks, Jolly ball, ChuckIt ball, Elk Antler, and "nose work". He has a strong prey drive for squirrels, rabbits, and cats so a fenced yard is a requirement. Fred **THRIVES** on human companionship; having a human nearby provides him with lots of comfort and joy. Because we all know a **GOOD DOG** is a **TIRED DOG** routine exercise and/or playtime is a must for FRED. Fred has successfully completed his 6 week training; his skills will need to be reinforced by his new owner as his trust relationship grows .
