

# Honeybee

Honeybee is almost 4yrs young, Jack Russell mix. spayed female, current on vaccines, about 32lbs, house trained and crate trained, hw negative, and like all of our canines...flea free. She loves and thrives on human companionship AND enjoys her outdoor time with her 4 legged sister, Gracie an adult Golden Retriever. **We believe an older and calm dog who is a role model will help her adjust to a new home, family and the routine of life....and as a possible playmate too.** Honeybee knows the following commands Sit, Wait/Stay, and Here. She loves training and would be great at agility. She is a working/hunting breed so daily playtime is a must for her ;-) When training we have found some "high value" treats that she seems to like ALOT....hot dog slices and/or Cheerios.

Like MOST young dogs, Honeybee is energetic (like a young toddler) ,so playtime and exercise should be an important part of her daily routine. She does enjoy car rides and will walk well on leash when using the Gentle Leader. Honeybee is a very HAPPY energetic girl, but will also show her calm side when she is comfortable and trusting of her companions and environment. She is good with most other dogs that are calm and typically adult age, very curios w/cats (don't recommend she live with this prey) ; she loves human companionship...is good with all family members (adults and children).
