

Jodi

"JoJo"

JoJo lived outside all her life as an only pet; NOW she is living inside and experiencing the joy and love of family companionship from her foster family. JODI is a young senior with a RENEWED SPIRIT, ZEST and STAMINA for life, due to help from her foster, vet care, and water therapy sessions.... JoJo maintains an active lifestyle....she can walk up to 2 miles a day !! She is spayed and a trim 73lbs, current on vaccines, hw negative, flea free, and house trained. Milk Thistle & SamE are supplements JoJo takes daily to help maintain her health; her pain medication (about \$20/month) helps with her arthritis ... her foster mom walks her 1 mile daily. Her temperament is your typical lab..... she wants to be beside you and a part of every party; she gets along great with children and adults (and is particular fond of her foster dad). JoJo will talk in her excitement especially when it comes to car rides and feeding time. She loves her soccer ball, loves to wrestle and play, enjoys her rope toys (which she will happily shred), being brushed, ears rubbed, cheese, stealing blankets, and taking dryer sheets out of laundry trash can (again, happy to shred). JoJo is not a swimmer, but does love getting in the kiddie pool if the opportunity arises. Due to her curiosity to explore, confidence, and strong prey drive for small animals (cats, rabbits, squirrels, small dogs) a **fenced yard is a definite requirement**. We recommend Jodi be the only female (or dominant girl) in her family.
