

JoJo

For many years, JOJO lived outside as an only pet; NOW she is living INSIDE her foster home with her foster mom, foster dad, and 4 furry companions (3 dogs and 1 cat); experiencing the joy and love of family companionship. JoJo maintains an active lifestyle, walking daily with her foster mom. All the love from her foster care, vet care, and water therapy sessions has brought JOJO (aka Jodi) a RENEWED SPIRIT, ZEST and STAMINA for life at age 11 1/2. She is very SHY around crowds, but her spirit sparkles bright when she is with family and comfortable surroundings. Like all of our DREAM girls she is spayed. JOJO is a trim 73lbs, current on vaccines, hw negative, flea free, and house trained. To help maintain her health she takes supplements daily and medication for her arthritis. JoJo's FAVORITE part of life is with her trusted companions; she gets along great with children and adults (and is particular fond of her foster dad). JOJO will talk in her excitement especially when it comes to car rides and feeding time. She loves her soccer ball, loves to wrestle and play, enjoys her rope toys (which she will happily shred), being brushed, ears rubbed, cheese, stealing blankets, and taking dryer sheets out of laundry trash can (again, happy to shred). JOJO will meander in a kiddie pool if the opportunity arises. Due to her curiosity to explore and strong prey drive for small animals, a fenced yard is a definite requirement. We recommend JOJO be the only female (or dominant girl) in her family.
