

Kona

Courtesy Post

KONA is a black lab mix, approx 3 yrs young, about 70lbs, male neutered, crate trained, house trained (is still a bit of a counter surf), he is current on all vaccines, hw negative, and micro-chipped. He was pulled from a county shelter in April due to lack of interest; he had a terrible ear infection and some skin infection as well...now he is completely healed and healthy, AND he would love to be your forever family companion. See the HEART on his chest?? Hard to resist a young boy like this with that special tattoo ! Kona likes to chase balls and chew on the larger ones, has some favorite rope toys, enjoys resting in "his" bed, and likes to suck (nurse) on his blanket too. He does great in the car, rides well, and enjoys it. Kona's caretaker describes him best as a "big goofy boy" ;-) who would do well with someone that ENJOYS the great outdoors as much as he does. If hiking and walking is an activity YOU enjoy routinely then KONA is your boy. With visitors, Kona gets excited, he does a butt wiggle, tail wagging; if too excited he may attempt to stand on 2 hind legs...his training has reduced his standing and touching the person/visitor significantly. Kona currently lives with other dogs (male and female), various sizes, none larger than him. He has not been tested with cats. Children older than 18 is recommended. To strengthen the bonding process and comfort level of KONA in his new family, Dream pet rescue will assist with some of the training fees. There are trainers in Miami County we can recommend.

**Courtesy Post means we have NOT met ASTRO,
we are sharing as a courtesy for his caretaker / owner.**

*For questions about KONA, Email petsRRpassion@gmail.com , your request
will be forwarded to his caretaker. Application form is located on the
ADOPTME page at DREAM4pets.org*
