

Lucy

JAN 2022
update

LUCY is a spayed female, currently in foster care, and is current on vaccines, flea, tick and heartworm free; she is house trained, crate trained and microchipped. Vet estimates **Lucy** to be 6yrs young and approx 75 - 80lbs. This beauty is a **confident** and **dominant** girl, who loves attention, a little playtime, has lab like qualities, enjoys training with Ritz crackers, hanging with her people; human companionship brings her the MOST comfort and joy, he/she is her **priority in life** ;-)
Lucy is a definite **EXTROVERT**...wants to meet/greet everyone she sees. She would do best with a submissive dog or as an only dog'; she is **dog selective** and wants to be the "princess" in her home. Her eye contact, love and adoration for her human companion is awesome! Her favorite activity: being next to her human companions in her easy chair, or playing/retrieving her favorite toy, laying in sunshine or near a heater, or taking a short walk. She walks very well on leash with her Sense-ation harness and responds well to "leave it" or when corrected. Her demeanor is confident, loving and friendly to the many adults she meets; due to her size and strength we recommend children over the age of 15. She does love car rides, and gets very excited during her travel time in the car.

Special note: In May, LUCY (who was living in our Miami county shelter) gave birth to puppies. A few weeks later, DREAM was asked to help with Lucy's "life threatening" surgery for severe mastitis.. DREAM accepted the request and brought LUCY into our rescue group and foster care home.

Adoption application located on the **ADOPTME** page
