

Lucy

LUCY is a spayed female, currently in foster care that includes other dogs and a cat. Like all of our fostered dogs, she is current on vaccines, flea, tick and heartworm free; she is house trained, crate trained and microchipped. Vet estimates Lucy to be 6yrs young and approx 70 -75lbs.

This beauty is a confident girl, who loves attention and car rides, has lab like qualities, enjoys training, hanging with her people, and could use a furry 4 legged friend (of similar size) to play with. In her foster home, she lives with 2 adult females dogs (similar height), and 1 adult male dog (larger) and a feline too. Her favorite activity: car rides and playing/retrieving a ball, rope toys and bones are well liked by LUCY too. She walks very well on leash with her Sense-ation harness and responds well to "leave it" or when corrected. Her demeanor is very loving and friendly to everyone she meets; however, due to her size and strength we recommend children over the age of 12.

Special note: In May, LUCY (who was living in our Miami county shelter) gave birth to puppies. A few weeks later, DREAM was asked to help with Lucy's "life threatening" surgery for severe mastitis.. DREAM accepted the request and brought LUCY into our rescue group and foster care home.

Adoption application located on the **ADOPTME** page at Dream4pets.org Fenced yard is required
