

# Luke

LUKE (aka Duke) is a neutered male, German Shepherd, current on vaccines and approx 100lbs, hw negative, flea free, and around 5-6 yrs young, crate trained, and house trained. He was an owner surrender due to neglect (and his ears are still a sensitive area); but has made a remarkable recovery due to wonderful vet care and volunteers helping to build his trust and respect in humans again. This boy is **handsome, intelligent, loving, obedient, enjoys being bathed, loves attention from his companions, enjoys tug of war, and has shown wonderful behavior around people.** He has been known to talk to his caretakers when excited or howl a bit when lonely. Luke seems to prefer the company of smaller dogs, his size or larger are not a good fit. We have found Luke (aka Duke) to be a sensitive boy who will thrive on additional training, routine exercise, and "work". Like most German Shep, Luke has a very sensitive stomach and is currently on Hills prescription food; we are working on transition him to a different brand. We truly believe this boy has definite and untapped potential to be a service or therapy dog!! A fenced yard is a requirement, and we recommend a family with adults (age 15 and older). If interested, send an adoption application found on the ADOPTME page at [DREAM4pets.org](http://DREAM4pets.org)
