

Sammy

SAMMY is a 2 - 3 year young, 32.4lbs, lab/corgi mix, neutered male, fully vaccinated, flea free, heartworm negative, and micro-chipped. His foster mom says: "SAMMY is a very happy, go lucky, energetic, playful young boy... who thinks life is an agility course. He likes to run, climb steps and lay on your lap ;-). He is a quick learner and very smart, so we are constantly training...he now knows sit and stay. Sammy is crate trained, house trained, GOOD with dogs and people (adults and children over the age of 12 are recommended). His favorite activity is being INSIDE with family companions or OUTSIDE hunting and exploring the yard. Yes, he is quite the hunter... got a mouse, rabbit, squirrel ?? SAMMY loves his ROPE toys and Kong (filled w/peanut butter) and is typically relaxed after he has had his playtime, exercise and some loving...especially belly rubs. He does great in the car ride and loves playing outside or just "hanging with his peeps outside". A fenced yard is always a requirement for our furry companions. Due to a severe injury on his right front leg and foot (left untreated months ago) Sammy had his front right leg removed...he is doing GREAT! Adoption application located on the ADOPTME page at DREAM4pets.org
